Na Carmo Wood pensamos na vida ao ar livre!

Chez Carmo Wood, on pense à la vie en plein air !

We think about life outdoors at Carmo Wood!

As particularidades da madeira | Les caractéristiques du bois | The particularities of wood

Além das características intrínsecas da madeira, ela é um organismo vegetal e, como tal, muitos parâmetros entram em jogo no seu amadurecimento: humidade, clima da região, poluição, natureza do solo... tantos elementos que influenciam muito a forma como a madeira cresce. E como todos os materiais naturais, a madeira tem as suas próprias características.

Outre les caractéristiques intrinsèques du bois, c'est un organisme végétal et, à ce titre, de nombreux paramètres entrent en jeu dans sa maturation : humidité, climat de la région, pollution, nature du sol... grandir. Et comme tous les matériaux naturels, le bois a ses propres caractéristiques.

In addition to the intrinsic characteristics, wood is a plant organism and, as such, many parameters come into play during its ripening: humidity, climate of the region, pollution, nature of the soil... So many elements that highly influence the way wood grows. And like all natural materials, wood has its own characteristics.

Subidas de resina

Este fenómeno natural pode aparecer ocasionalmente na superfície de madeiras de resinosas durante a secagem ou após um período quente. Essas subidas podem ser facilmente removidas, basta raspar com uma espátula e usar terebintina/água para limpar.

Remontées de résine

Ce phénomène naturel peut parfois apparaître à la surface des résineux lors du séchage ou après une période chaude. Ces montées peuvent être facilement enlevées, il suffit de gratter avec un couteau à mastic et d'utiliser de l'eau de térébenthine/raz pour nettoyer.

Resin rise

This natural phenomenon can occasionally appear on the surface of resinous woods during drying process or after a hot period. This resin can be easily removed by simply scraping with a spatula and using turpentine/rust water to clean.

Rachas

Aparecem principalmente em madeira exposta ao ar livre com variações de humidade e temperatura. Também podem ser encontradas na forma de pequenas rachas em todos os outros produtos. Fecham-se parcial ou completamente durante os períodos húmidos ou chuvosos. A sua presença em nada compromete a durabilidade da madeira em causa ou a sua resistência.

Fissures

Elles apparaissent principalement sur des bois exposés à l'air libre avec des variations d'humidité et de température. On les retrouve également sous forme de petites fissures dans tous les autres produits. Elles se ferment partiellement ou complètement pendant les périodes humides ou pluvieuses. Leur présence ne compromet en rien la durabilité du bois en question ni sa résistance.

Cracks

They appear mainly in wood exposed to open air with variations in humidity and temperature. They can also be found in the form of small cracks in all other products. They close partially or completely during wet or rainy periods. Their presence does not compromise the durability of the wood or its strength.

Cristalização verde ou azul

Podem aparecer em madeira tratada em autoclave. São pequenas gotas de resina que sobem à superfície. Esses cristais geralmente desaparecem espontaneamente. Uma leve escovação também pode ser feita. Este fenómeno não compromete em nada a durabilidade da madeira em questão.

Cristallisation verte ou bleue

Peut apparaître sur bois traité en autoclave. Ce sont de petites gouttes de résine qui remontent à la surface. Ces cristaux disparaissent généralement spontanément. Un brossage léger peut également être effectué. Ce phénomène ne compromet en rien la durabilité du bois en question.

Green or blue crystallization

They can appear in autoclave-treated wood. They are small drops of resin that rise to the surface. These crystals usually disappear spontaneously. A light brushing can also be done. This phenomenon does not compromise the durability of the wood.

A cor acinzentada

É um fenómeno natural que aparece gradualmente ao expor a madeira (tratada ou não) à luz e ao sol. A aceitação dessa tonalidade é uma questão de gosto pessoal. A aplicação de um saturador ou de um corante irá prevenir o seu aparecimento. O aspeto acinzentado em nada compromete a durabilidade da madeira em questão.

La couleur grisâtre

C'est un phénomène naturel qui apparaît progressivement lors de l'exposition du bois (traité ou non) à la lumière et au soleil. L'acceptation de cette nuance est une question de goût personnel. L'application d'un saturateur ou d'un colorant préviendra son apparition. L'aspect gris ne compromet en rien la durabilité du bois en question.

The grayish color

It is a natural phenomenon that appears gradually when exposing wood (treated or not) to light and sun. The acceptance of this tonality is a matter of personal taste. The application of a saturator or a dye will prevent its appearance. The grayish appearance in no way compromises the durability of the wood.

As diversas tonalidades

Como a madeira é um material natural, pode apresentar diferenças de cor, seja ela tratada ou não. Existem claras variações cromáticas entre o cerne e o borne (especialmente no caso do pinho), mas também e principalmente entre várias peças de madeira devido à história única de cada árvore. Essas diferenças de cor harmonizam-se com o tempo.

Les différentes nuances

Le bois étant un matériau naturel, sa couleur peut varier selon qu'il est traité ou non. Il existe de nettes variations de couleur entre le bois de cœur et l'aubier (surtout dans le cas du pin), mais aussi et surtout entre les différentes pièces de bois en raison de l'histoire particulière de chaque arbre. Ces différences de couleur s'harmonisent avec le temps.

The various shades of color

As it is a natural material, wood can present color differences, whether it is treated or not. There are evident color variations between the heartwood and the post (especially in the case of pine), but also and mainly between various pieces of wood due to the unique history of each tree. These color differences harmonize over time.

Manchas de bolor

Podem aparecer ocasionalmente em madeira tratada armazenada em ambiente húmido. A mancha formada é geralmente preta e às vezes cinza, mas permanece sempre na superfície. Esses bolores na maioria das vezes desaparecem durante os trabalhos com a madeira sob o efeito da chuva e do vento. Uma leve escovação quando estão secos também é eficaz. A sua presença superficial não compromete em nada a durabilidade da madeira em causa.

Taches de moisissure

Elles peuvent occasionnellement apparaître sur du bois traité stocké en milieu humide. La tache formée est généralement noire et parfois grise, mais elle reste toujours en surface. Ces moisissures disparaissent le plus souvent lors du travail du bois sous l'effet de la pluie et du vent. Un léger brossage lorsqu'ils sont secs est également efficace. Sa présence en surface ne compromet en rien la durabilité du bois en question.

Mold stains

They may occasionally appear in treated wood stored in a humid environment. The formed spot is usually black and sometimes gray, but always remains on the surface. These molds most often disappear during woodwork under the effect of rain and wind. A light brushing when they are dry is also effective. Its superficial presence does not compromise in any way the durability of the wood in question.

Mobiliário urbano

Mobilier urbain

Urban furniture

A Carmo Wood conta já com mais de 40 anos de experiência no fabrico de mobiliário urbano especialmente vocacionado para resistir às intempéries e eventuais atos de vandalismo.

Carmo Wood a déjà plus de 40 ans d'expérience dans la fabrication de mobilier urbain spécialement conçu pour résister aux intempéries et aux éventuels actes de vandalisme.

Carmo Wood has more than 40 years of experience in the manufacture of street furniture specially designed to resist bad weather and any acts of vandalism.

Medieval Park

Os novos parques infantis certificados da Carmo Wood garantem mais diversão com total segurança. Com um design que remete para o imaginário das aldeias medievais, estes parques prometem ajudar as crianças a desenvolver as suas capacidades motoras enquanto se divertem.

4>14 anos

Les nouveaux parcs pour enfants certifiés de Carmo Wood garantissent plus de plaisir en toute sécurité. Avec un design qui rappelle l'imagerie des villages médiévaux, ces parcs promettent d'aider les enfants à développer leurs capacités motrices tout en s'amusant.

4>14 ans

The new certified children's playgrounds from Carmo Wood guarantee more fun with total safety. With a design that recalls the imagery of medieval villages, these playgrounds help children develop their motor skills while having fun.

FunPark[®]

by Carmo

Fun Park

Todos os equipamentos estão certificados por forma a garantir a segurança das crianças e potenciar as suas brincadeiras e aprendizagem.

Com um design criativo e apelativo os parques infantis FunPark têm uma multiplicidade de materiais e jogos didáticos onde várias horas de brincadeira estão garantidas em qualquer parque infantil da nossa gama.

Tous les équipements sont certifiés afin de garantir la sécurité des enfants et d'améliorer leur jeu et leur apprentissage.

Avec un design créatif et attrayant, les parcs pour enfants FunPark disposent d'une multitude de matériaux et de jeux éducatifs. Plusieurs heures de jeu sont garanties dans tous les parcs pour enfants de notre gamme.

All the equipment is certified to ensure the safety of the children and enhance their play and learning.

FunPark children's playgrounds, with a creative and appealing design, have multiple materials and educational games to guarantee several hours of play in any playground of our range.

0 > 6 anos
0 > 6 ans
0 > 6 years old

A pensar no rápido desenvolvimento das crianças até aos 6 anos, este conjunto de equipamentos permite, inclusive para os que ainda só gatinham, adquirir e desenvolver aptidões motoras, assim como desenvolver a capacidade de perceção e identificação do mundo que os rodeia. Utilizando escalas adequadas aos nossos pequenos heróis, garantem-se fortes emoções e divertimento em total segurança.

A l'égard du développement rapide des enfants jusqu'à l'âge de 6 ans, cet ensemble de jouets leur permet d'acquérir et de développer des compétences motrices. Ainsi que de développer leur capacité à percevoir et à identifier le monde qui les entoure, même pour ceux qui ne maîtrisent pas encore la marche. Avec des équipements conçus à l'échelle de nos petits héros, émotions fortes et plaisir garantis en toute sécurité.

This set of toys, with the rapid development of children up to 6 years old in mind, allows them to acquire and develop motor skills, as well as develop their ability to perceive and identify the world around them, even children who are still crawling. Using scales that are suitable for our little heroes, these toys guarantee excitement and fun in complete safety.

Com muitos desafios de ação e de complexidade variada, esta linha adequa-se a crianças até aos 12 anos, permitindo pôr à prova as suas habilidades e explorar os limites do seu corpo, satisfazendo assim áreas importantes do seu desenvolvimento.

Esta linha oferece brincadeiras em pontes de corda, torres, redes de escalada e rampas, escorregas, baloiços e muito mais, garantindo infinitas horas de brincadeira em segurança.

Avec de nombreux défis d'action et d'une complexité variable, cette ligne convient aux enfants jusqu'à 12 ans, car elle leur permet de tester leurs compétences et d'explorer les limites de leur corps, satisfaisant ainsi des domaines importants de leur développement.

Cette ligne permet de jouer sur des ponts de cordes, des tours, des filets et des rampes d'escalade, des toboggans, des balançoires et bien plus encore, garantissant des heures interminables de jeu en toute sécurité.

With many action challenges of varying complexity, this range is suitable for children up to 12 years old, allowing them to test their skills and explore the limits of their body, thus satisfying important areas of their development. This range offers games on rope bridges, towers, climbing nets and ramps, slides, swings and much more, ensuring endless hours of safe play.

A Carmo Wood preocupa-se em desenvolver e melhorar constantemente produtos para a proteção e segurança das crianças, como é exemplo os pisos de borracha, próprios para parques infantis. A grande capacidade de drenagem deste produto permite uma utilização ímpar dos parques durante o período das chuvas.

Carmo Wood est une société soucieuse de la protection et de la sécurité des enfants, qui cherchent ainsi à développer et améliorer constamment ses produits, en proposant notamment des sols en caoutchouc, adaptés aux parcs pour enfants. La grande capacité de drainage de ce produit permet une utilisation inégalée des parcs pendant la saison pluvieuse.

Carmo Wood is concerned with developing and constantly improving products for the protection and safety of children, as is the example of the rubber pavements specifically for playgrounds. The large drainage capacity of this product allows the unrivalled use of the playgrounds during rainy periods.
